

To: The Green National Committee of the
Green Party of the United States

Fm: The Elections Tabulation Committee
of the 2006 Annual Meeting in Tucson, Arizona

Date: Saturday, July 29th, 2006

Re: Report of the Elections Tabulation Committee

Your Elections Tabulation Committee has met and tabulated the ballots cast by the Green National Committee in the elections this date for Party Co-Chairs and Steering Committee members, for Party Treasurer and for members of the Coordinated Campaign Committee.

In the election for Co-Chair of the Green Party of the United States, we find that

- Sarah "echo" Steiner
- Jim Coplen
- Liz Arnone

have each been elected to a two year term, to expire upon the election of their successors in 2008.

In the election for Treasurer of the Green Party of the United States, we find that Jody Grage has been elected to a two year term, to expire upon the election of their successor in 2008.

In the election for members of the Coordinated Campaign Committee, we find that:

- Sally Kim
- Greg Gerritt
- Nan Garrett

have each been elected to a one year term to expire upon the election of their successors in 2007.

We recommend that the Green National Committee certify the candidates named above as having been elected to the bodies indicated and that they be seated in these roles without delay.

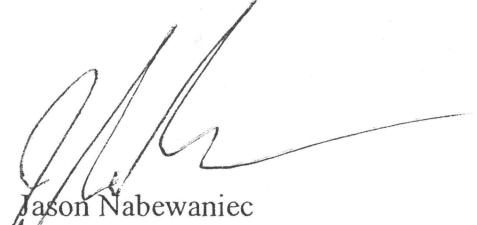

The Election Tabulation Committee,

Jill Bussiere

Phil Huckelberry

Jason Nabewaniec

Donna Werley

Cat Woods

Narrative Description of the tabulation of the votes for Co-Chair of the Green Party of the United States:

Decisions made by the Election Tabulation Committee:

1. An NC ballot omitted a signature for a proxy ballot. The delegate, Mazoor Cheema, was consulted. He signed the ballot, and the committee accepted it.
2. An OH delegate had submitted 2 proxy ballots with no personal vote. Laura Hampton was consulted. She removed the proxy designation from one of the ballots, and the committee accepted both.
3. Two DE ballots, one personal and one proxy, had only checkmarks instead of numbers. David McCorquodale was consulted. He said he was out of the room when the voting procedures were being explained and thought that voters should just vote for 3 candidates. The committee considered this carefully. While it was not in the rules, the committee decided that a precedent had already been set in consulting voters and allowing correction. This case was different, since the rules specified a directive of discarding rankings where there were equal rankings of more than one candidate in a race. However, the committee felt that there was clearly no fraud or attempt to change the result of the election and decided to rule in favor of honoring the intent of the voter. There was a concern if an observer's ballot were in question. There was also a concern that if a voter was not available for consultation, the committee would not know how long to wait. There was a proposal to amend the rules in the future to clarify such situations.

The committee entered the ballot data into duplicate spreadsheets on two different computers, with one member of the committee entering data, one member of the committee reading ballots and witnessing the data entry, and a third non-committee observer also witnessing at each computer. The committee verified that both ballot files were the same by copying the file from computer 2 to computer 1, opening both files on computer 1, copying the tabulation results column from file 2 to file 1 next to the tabulation results file in file 1, and using a spreadsheet function to compare the two columns. The two tabulation results columns were identical. The tabulation column was then copied into a text file that was put into the proper format to be uploaded to the Lundell STV choice counter software on the web. The text file was saved and uploaded to the choice counter module on www.lobitos.net/voting. The website provided the results.

For the Treasurer and CCC elections, a similar process was followed, but only on one computer.

RECOMMENDATIONS

The Election Tabulation Committee urges the National Committee to amend the election rules to clarify that the tabulation committee should have discretion for resolving questions not addressed by the rules, and further that the ETC is authorized and urged wherever possible to consult those voters, who have not been witnesses to the election results, on any mis-marked ballots.

The Election Tabulation Committee further recommends that the National Committee amend the election rules to clarify how the election is to be conducted at voting time, including specifying who is in charge of developing and distributing ballots.

Jonathan Lundell should also be consulted regarding how his software processes instances where two or more candidates cross the threshold at the same time.
