Federation of Green Parties of the Americas

URGENT STATEMENT

REJECTION OF THE UNILATERAL MILITARY AGGRESSION AGAINST VENEZUELA

The undersigned Green parties, members of the Federation of Green Parties of the Americas, based on the fundamental principles of Peace, Environmental Justice, Democracy, and respect for Pachamama, express our strongest rejection of the military actions perpetrated by the United States government with the invasion of Venezuelan territory on January 3, 2026.

Commitment to Democracy

The FPVA parties promote respect for democratic processes as a legitimate exercise of the right of peoples to choose their own government, demanding the free political association of their citizens and the full exercise of human rights. We advocate for Venezuela to quickly move towards a democratic transition with electoral guarantees and recognition of the results, which will strengthen its institutions.

Violation of International Law

We denounce the military action carried out by the United States on Venezuelan soil as a flagrant violation of the United Nations Charter and the fundamental principles of sovereignty. The unilateral use of military force constitutes, in practice, a breakdown of the global legal order and undermines respect among nations.

Threat to Continental Stability

An attack against Venezuela represents an aggression against the integrity of the entire region. Our America must be a territory of peace; we will not allow it to become a battlefield for foreign powers.

Defense of Life over Politics

The Venezuelan Ecological Movement is in the democratic opposition to the current government, but does not justify armed intervention. The protection of life and territory transcends any partisan political differences; violence will never be the path to the collective well-being we seek. We publicly call for the formation of a unity

government that will strengthen, during this transition, the autonomy of public institutions and promote transparent elections at an early date.

Action from the Global Greens

The signatory parties, as members of the Global Greens, demand explicit actions from the international community and human rights organizations. We urge world leaders to condemn this dangerous precedent that jeopardizes the future of future generations and the security of the planet.

For Peace, Sovereignty, and Life in the Americas!
